American River College conducts, in cooperation with the local construction unions, a number of apprenticeship programs (most of which can lead to an Associates of Arts degree). An apprenticeship program is a formal system of occupational training from two to five years that combines paid employment, on-the-job training and job related college level instruction in order to develop highly skilled workers.

Apprenticeship programs are a cooperative effort between the Joint Apprenticeship Training Committee (JATC) and the college. The JATC is composed of representatives from both labor and management from each apprenticeship area and their purpose is to oversee apprenticeship training. All American River College apprenticeship programs are approved by the Division of Apprenticeship Standards of the California Department of Industrial Relations.

Enrollment in an apprenticeship course is limited to registered apprentices, however anyone meeting the apprenticeship requirements can apply for acceptance (Apprenticeship 100 is open to everyone without prerequisites). Information on admission to apprenticeship programs can be obtained from the local JATC having jurisdiction over the trade in which you are interested. Listed below are the program types and contact persons.

### A.A. Degree: Carpenters Apprenticeship

| Requirements Certificate/Degree Major: | 20.4 units |
| CARPT 100, 102, 104, 110, 112, 114, 120, 122, 130, 140, 142, 150, 160, 162, 170, 180, 190, 200. |

###干wall/Lathing Apprenticeship

This is a four-year construction trade program. Drywall/Lathing program teaches apprentices how to provide architectural appeal, fire protection and structural integrity to houses, office buildings, warehouses, shopping malls, etc. This includes steel stud framing, wall covering and installation.
