LAST NAME	FIRST NAME	MI	DATE
STUDENT NUMBER	MAJOR/CAREER GOALS	HOME PHONE NO.	WORK PHONE NO.

Please list your current COMPUTER course for this semester below.

CODE CODE	COURSE NAME	INSTRUCTOR NAME	TIME FRAME*
			<input type="checkbox"/> 8 Week <input type="checkbox"/> 9 Week <input type="checkbox"/> Full Semester

* Please check appropriate Box

In order for ARC to satisfy software license agreements, all users must be informed of, and agree to follow, certain conditions. All users must agree to the following conditions to use any Computer Science & Information Technology Lab.

All signs posted in the Computer Science & Information Technology Lab must be adhered to.

No food, drink or children allowed in any Computer Science & Information Technology Lab.

Directions must be followed when given by any lab assistant or instructor concerning use of equipment/facilities or student conduct.

The current open lab schedule, posted inside the Computer Science & Information Technology Lab (On the front desk) and on the outside of the door of the Computer Science & Information Technology Lab, must be followed.

Students must not interrupt a class to ask to use a computer.

Non-instructional use of the equipment and resources is not permitted, including the installation of games or any other software not installed directly by the Computer Science & Information Technology Lab.

Current enrollment in the Computer Science & Information Technology or Business Area class that corresponds with the software being used is required.

A valid password may be used for assigned purposes only. Sharing of any passwords with other students is not permitted.

ALL computer usage will be monitored for compliance of this agreement.

Software may not be copied, unless specified by the instructor.

The rules and restrictions concerning Internet connection must be followed, where applicable. The following activities are not allowed:

-  Internet use for purposes other than classroom assignment.
-  Transmitting unsolicited information, which contains profane language or panders to bigotry, sexism, or other forms of discrimination.
-  Using the Internet to gain unauthorized access to any computer.
-  Engaging in personal attacks: writing bullying, intimidating, threatening or harassing entries.
-  Making threats (directed towards others or yourself) without expecting the recipients of those threats, the college, and the police to consider them real.
-  Transmitting information which contains obscene, indecent, lewd or lascivious material or other material which explicitly or implicitly refers to sexual conduct. This includes displaying such material where it could potentially be viewed by other individuals.
-  Inappropriate mass mailing, which includes multiple mailings to newsgroups, mailing lists, or individuals, e.g. "spamming", "flooding" or "bombing."

Attempts by students to obtain, manipulate, delete or change the contents of another user's files, passwords, etc., are regarded as infractions of the January 1980 California Computer Crime Penal Code (Senate Bill No. 66). Attempts to 'break' the operating system constitute a felony under this law. A copy of this document is posted in the Computer Science & Information Technology Lab - Room 152.

Students who do not comply with these terms may face disciplinary measures including formal disciplinary actions from American River College, liability for all damages, attorney fees and court costs.

Instructional Assistants supervise the computer labs, provide support services, and monitor the computers to assure they are used for legitimate instructional purposes; they are in charge of the labs. Directions given by the Instructional Assistant concerning use of equipment and facilities must be observed. They will help if they can, but are NOT, however, full-time tutors. To expect one person to know the ins and outs of all the programs at American River College is an unreasonable expectation. If you need a tutor, please make arrangements with the Tutoring Center in the Learning Resource Center.

This agreement will protect both you and the college.

Please contact a lab assistant or instructor if you do not understand these terms, or would like something explained.

I have read and understand this computer use agreement and agree to follow the conditions herein.
